

DR. VIC A. NARURKAR

FAVORITE PART OF YOUR JOB Getting to know my patients and earning their confidence **BEST ADVICE YOU'VE RECEIVED** Listen to your patients and what they want **ALTERNATIVE OCCUPATION** Painter **HOBBIES** Painting, bicycling, hiking and working out **FRAMED PHOTOS ON YOUR DESK** My dogs **BEAUTY PRODUCT EVERYONE SHOULD HAVE** Sunscreen **I'M NEVER WITHOUT** My computer **I WOULD LOVE TO OWN** An olive farm in New Zealand

THE PEOPLE'S PRACTICE

"Establishing a **TRUSTING RELATIONSHIP** with patients is a vital part of my philosophy," Dr. Narurkar stresses. Treating patients like members of their "family" has made the Bay Area Laser Institute a practice that **THRIVES FROM REFERRALS**, both by patients and his peers—including other dermatologists and plastic surgeons. "I find it humbling when other doctors trust me not only with their skin-care needs, but with those of their families and patients as well." Keeping in line with his respect for continuing education, the dermatologist participates in **PRO-BONO WORK**, parlaying his skills in other mediums, contributing to greater causes. Whether he is teaching residents at UC Davis or co-directing Cosmetic Bootcamp®, an education venue for core aesthetic physicians, Dr. Narurkar finds a great deal of satisfaction in mentoring new talent and helping improve the lives of others through his skills. "**EDUCATING THE NEXT GENERATION** is paramount to me, as is helping others improve their self-worth. I really enjoy the personal gratification dermatology brings me."

INSIDE INFORMATION

innovator, educator

Dr. Vic A. Narurkar of the Bay Area Laser Institute has built a career leading the cutting-edge of technological advances relating to skin-care. "In my fellowship and at my present practice, I have run clinical trials and have worked to help develop many of the lasers and treatments that are standard in the field of dermatology."

The San Francisco-based doctor began his career in academics, where he ran the University of California Davis Laser Center, and continues to serve there as an associate clinical professor. His inquisitive love for education led him to research developmental uses for a host of technologies, including the Fraxel™ SR laser and combination treatments with Botox® and fillers. When not pursuing the next great medical advancement, Dr. Narurkar offers patients a multitude of nonsurgical modalities, such as photofacials, Radiesse®, Juvéderm™ and the ever-popular Botox. In fact, his practice is a Botox training center where other doctors come to learn proper injection techniques. "Possessing the skills to make patients happy is just one aspect of what I do. The other involves dedicating myself to ongoing research."

The modern, boutique practice strives to be accommodating and accessible to patients every step of the way, starting with a personal consultation and ending with a natural-looking outcome, all executed by the dermatologist himself. "I perform the consultations and the procedures because I feel that the initial trust-building aspect is imperative to forging a solid partnership where both doctor and patient work together, toward a common goal. From there, once a mode of action is established, I realize the patient's vision to the best of my abilities, in relation to my perception of their goals and in tandem with a discerning, artistic approach."

"The initial trust-building aspect is imperative to forging a solid partnership."

—VIC A. NARURKAR, MD, FAAD

BOARD CERTIFICATION
American Board of Dermatology

MEDICAL DEGREE
Stanford University

INTERNAL MEDICINE INTERNSHIP
Stanford University

DERMATOLOGY RESIDENCY
Stanford University

FELLOWSHIP
Cleveland Clinic
